ThermoFisher
SCIENTIFIC

The world leader in serving science

Thermo Scientific Informatics

Unparalleled Industry Expertise

- Informatics provider for over 30 years

- Over 300 dedicated employees with 100 in-house services personnel

- Over 1800 successful LIMS implementations around the world

- Second to none LIMS, CDS SDMS, & integration capabilities

- Strategic partnerships with organizations such as Amazon web services

- Integration & lab specialists

Thermo Fisher
SCIENTIFIC

A complete laboratory and management solution

CDS
Streamline your chromatography and routine mass spectrometry workflow with one CDS.

LES & ELN
Simplify the execution of your methods and SOPs by driving analysts step by step through the process.

LIMS
Manage the data, resources, and workflows of your laboratory, turning your data into actionable business intelligence.

Integration
Integrate your laboratory from instruments through to enterprise systems to achieve end to end data management.

SDMS
Visualize and securely share data across your organization across multiple techniques and vendors.

ThermoFisher
SCIENTIFIC

Thermo Scientific™ Integrated Informatics

- Includes laboratory management, chromatography and scientific data management and procedural execution capabilities

- Manages the entire production process to ensure you are getting the right product to the right customers

- Comply with ISO 17025, 21 CFR 11 and other industry regulations

- Integrates with your current instruments , laboratory and enterprise software to make the most out of your existing technology investment

- A single solution for your entire laboratory workflow designed to deliver improved efficiency and productivity

Turn your samples into knowledge
